Definitive Healthcare

Enrich your systems with clean, clear, reliable data

Deliver the data your team needs to drive more business

With Definitive Healthcare's Data Integration offering, clients can augment and enrich their internal systems with high-quality, up-to-date and actionable data from Definitive Healthcare's platforms. Our seasoned Data Integration team helps clients identify and embed business critical data elements from Definitive Healthcare into the systems and workflows their teams use to drive go-to-market planning, gain sales and market intelligence and power product and corporate development.

Get even more value from the Definitive Healthcare platform

The Data Integration team leverages their vast experience to engage clients in a consultative process, delivering a tailored, high-quality approach that helps clients to:

- **Optimize productivity of sales and marketing teams** by putting key pieces of healthcare information into their existing workflows.
- **Maximize the value of internal systems and data sources** by keeping healthcare-related data accurate and up-to-date.
- **Improve data cleanliness and hygiene** by aligning their account-level healthcare organization data with our continually updated solution.

Integrate with ease using our robust, multi-layered offering

Four powerful ways to integrate your data

No two clients have the same data integration goals or core business systems. The Data Integration team will utilize a combination of these methods to create a tailored integration approach that delivers the right data to the right systems at the right cadence.

CRM
Bring critical data on healthcare executives, providers, and organizations directly into your system of record.

Commercial RESTful APIs
Clients with development resources can create custom web experiences and mobile applications using Definitive Healthcare's RESTful APIs.

On-demand data reporting and exports
Clients can create custom reporting within our solution, export those reports and then upload the data into their own systems as needed.

Data Sharing
Access specific Definitive Healthcare datasets through Snowflake or Databricks Data Share. Quickly, easily, and securely ingest our robust data with all the benefits of Snowflake's Direct Data Sharing or Databricks Delta Sharing.

Maximize your investment with minimal resource requirements

The Data Integration team's goal is to make the process as easy as possible. To get started, clients only need to provide the following:

Project point of contact

Data extract from target system

A collaborative attitude
